Ceiling Fixture 42381-16 "Tegethoff"

The World Wide Family

The idea for this fixture stems from a project where we picked up the shape of a conference table and brought this to the ceiling.

The fixture was made in the best way where the lights are completely hidden behind crystals in a dense curtain. Also the bottom section we made in a continuous cover of crystals. The type of construction enables the creation of fixtures in almost any shape desirable.

Also the application is variable as this design can be mounted directly to the ceiling, suspended with chains or rods or supported on a base as a floor- or table lamp.

Design: Lobmeyr, 2006; Modern

Dia.: 110 cm, H.: 25 cm; Weight: 35 kg

Material: Brass, lead-free crystal; Finish: Nickel

Lights: 16 x E14; Max. Wattage: 960 W

Special requests: Other finishes, alternative shapes and suspensions
